DE 198 07 460 teaches a method for controlling gas flow within a device comprising the steps of providing a spin chuck with at least two exhaust levels for separately collecting gas from the interior of the liquid collector by generating gas flow in at least two of the exhaust levels (Abstract, Figure 2). DE 198 07 460 does not teach or suggest individually generating different gas flow conditions in at least two of the exhaust levels.

12. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
